SUMMARY

Backend Engineer specializing in scalable microservices and distributed system architecture. Currently building production-grade backend infrastructure at Digident India with a focus on high-performance APIs, database optimization, and cloud deployments. Shipped 10+ applications including AI SaaS, e-commerce, and real-time platforms. Strong algorithmic foundation with 1500+ DSA problems solved. M.Sc. Mathematics & Computing, IIT ISM Dhanbad.

EDUCATION

Indian Institute of Technology (ISM), Dhanbad 2023 – 2025 M.Sc. Mathematics & Computing CGPA: 7/10

EXPERIENCE

Digident India Pvt. Ltd. (Surat) — Backend Developer Oct 2025 – Present

- Built and maintained scalable backend infrastructure for [digident.in](#) and [manage.digident.in](#), delivering production-grade RESTful APIs for customer-facing and administrative platforms.
- Developed core backend modules (attendance, blog, job portal, product management) and designed optimized product-listing APIs with filtering, search, sorting, and pagination for large datasets.
- Implemented secure permission-based access control and role-based authorization to protect administrative operations.

Bindal Classes — Website Manager Sep 2024 – Jan 2025

- Managed full-lifecycle website operations and redesigned UI/UX to improve engagement and simplify navigation for students and faculty.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C++, C, SQL

Backend: Node.js, Express.js, RESTful APIs, Socket.io, Authentication & Authorization, Role-Based Access Control

System Design: Microservices, Distributed Systems, Event-Driven Architecture (Kafka, RabbitMQ), Scalable Backend Design

Databases & Caching: MongoDB, PostgreSQL, MySQL, Redis, Query Optimization, Indexing

Frontend: React.js, Next.js, Redux Toolkit, TailwindCSS, HTML5, CSS3

Cloud & DevOps: AWS (EC2), Docker, CI/CD, Render, Vercel, Git, GitHub

Tools & Integrations: Postman, Stripe, Razorpay, Cloudinary, Clerk, Google OAuth, OpenAI API, Gemini AI

PROJECTS

SwiftBite – Real-Time Food Delivery (Microservices) — [React](#), [TypeScript](#), [Node.js](#), [RabbitMQ](#), [Socket.io](#), [MongoDB](#), [Razorpay](#)/[Stripe](#), [Docker](#), [AWS](#) [GitHub](#) — [Live](#)

- Architected a Swiggy/Zomato-style platform on a 6-service microservice architecture (Auth, Restaurant, Rider, Realtime, Admin, Utils) with RabbitMQ-based inter-service event streaming.
- Implemented real-time order tracking, automated rider dispatch, and live map navigation via Socket.io; integrated Razorpay & Stripe and containerized all services with Docker on AWS.

HireHeaven – Microservice Job Portal with AI — [Next.js](#), [Node.js](#), [PostgreSQL](#), [Apache Kafka](#), [Redis](#), [Gemini AI](#), [Razorpay](#), [Docker](#), [AWS](#) [GitHub](#) — [Live](#)

- Built a 5-service recruitment platform with Apache Kafka event-driven email notifications and Redis-backed password reset & rate limiting, deployed on AWS EC2 with Docker.
- Integrated Gemini AI for an AI Career Advisor and ATS Resume Analyzer; added role-based hiring and Razorpay subscriptions with secure HMAC signature verification.

Chat-App – Real-Time Messaging Platform (Microservices) — [Next.js](#), [Node.js](#), [MongoDB](#), [Socket.io](#), [RabbitMQ](#), [Redis](#) [GitHub](#) — [Live](#)

- Engineered a 3-service real-time chat system with passwordless OTP login (Redis OTP store + rate limiting) and RabbitMQ-decoupled transactional email delivery.
- Implemented Socket.io for instant messaging, typing indicators, online presence, and seen receipts; image sharing via Cloudinary, fully Dockerized on AWS.

The Reading Retreat – Microservices Blogging Platform — [Next.js](#), [Node.js](#), [PostgreSQL](#), [Redis](#), [RabbitMQ](#), [Gemini AI](#) [GitHub](#) — [Live](#)

- Developed a 3-service blogging platform with Redis caching and RabbitMQ-driven cache invalidation for consistently fresh feeds across services.
- Integrated Gemini AI writing assistance (grammar correction, auto-generated descriptions), Google OAuth, comments, and bookmarking.

ACHIEVEMENTS

- IIT JAM 2023: Achieved AIR 540 in Mathematics among 13,333 candidates (Top 4% nationally).
- Coding Profiles: [GFG](#): **700+ problems** (Institute Rank 38), [LeetCode](#): **350+ problems**, 30 contests (Max Rating 1697), CodeStudio: **190+ problems** (Rating 1669).
- Completed CodeHelp Web Dev (DOT Batch) and DSA Supreme Batch (Full-Stack DSA).
